

ECDC, EVD & VBORNET

Annual General Meeting VBORNET 18-20 April 2011, Antwerp, Belgium

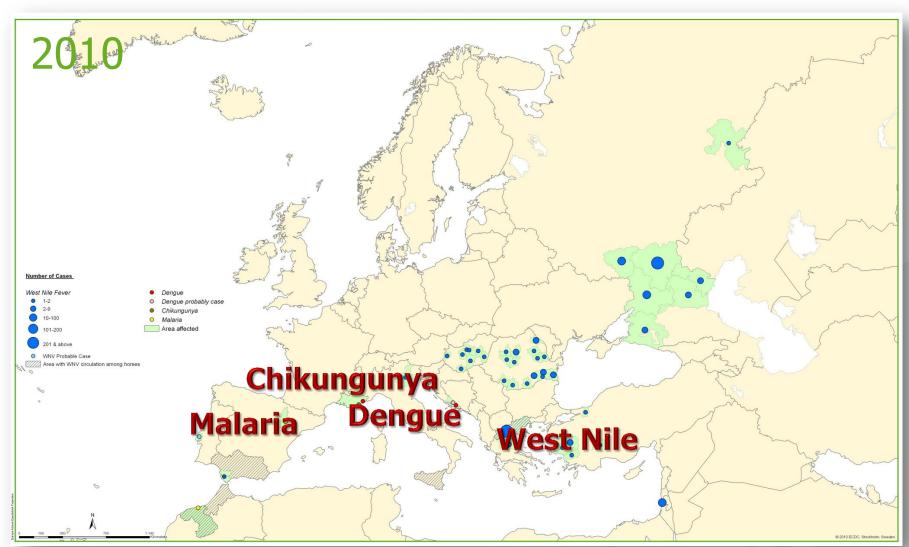

Wim Van Bortel on behalf of the Emerging and Vector-Borne Diseases team European Centre for Disease Prevention and Control

Vector-borne diseases are a specific group of infections that represent a **(re-)emerging** threat to Europe requiring particular attention

Emerging en vector-borne diseases (EVD)

EVD programme

- Knowledge vector distribution and prevention and control strategy;
- Early response by providing laboratory support;
- Epidemiologic updates and fact sheets;
- Reporting standards for surveillance of vector-borne diseases;
- Reinforce links with veterinary medicine, public health, and other stakeholders.

EVD partners

EU Member States

Institutes, universities, research programmes and projects

European Commission

International organisations

- World Health Organization European Region and Headquarters
- OIE, FAO
- EFSA

Specific networks including

- ENIVD
- EuroTravNet
- VBORNET

EVD networks

- European network for viral imported disease Collaborative laboratories for outbreak response: ENIVD-CLRN
 - diagnosis
 - collaboration, links with veterinary laboratories

EuroTravNet

- detection, verification, assessment and communication
- ad hoc response
- Arthropod vector surveillance network: VBORNET
 - map vectors
 - link entomology and public health

EVD tick-borne diseases

- Communication: toolkits & spotlight
- Consultations (Nov 2010)

Projects on epidemiology, case definition and reporting systems (ongoing)

- (expected) OUTCOMES:
 - Epidemiological situation
 - Case definitions
 - Laboratory diagnosis
 - Status of surveillance
 - Identification of risk areas & groups
 - Burden of Disease project
 - Databases on TBD

EVD mosquito-borne diseases

- Consultations
- Dengue risk maps
- (Rapid) Risk Assessments
- Field visits in Greece and Romania
- (expected) OUTCOMES:
 - Vector surveillance
 - Impact of vector control?
 - West-Nile decision tool

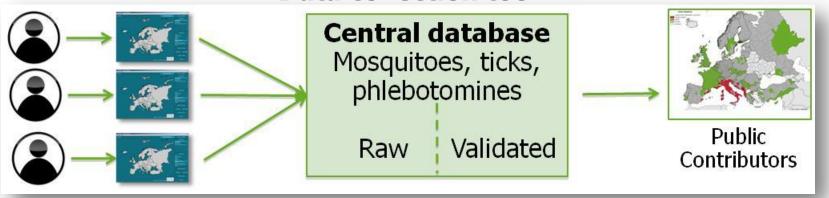

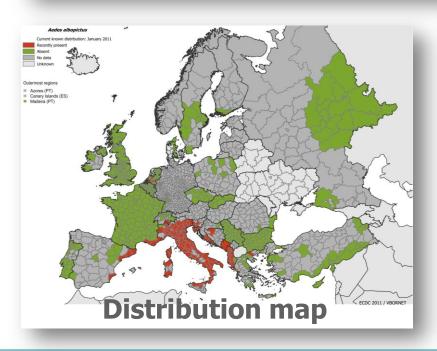

To improve knowledge on **vector distribution** and to contribute to development of a **strategy** for the prevention and control of vector-borne diseases in Europe

VBORNET – distribution maps

Data collection tool

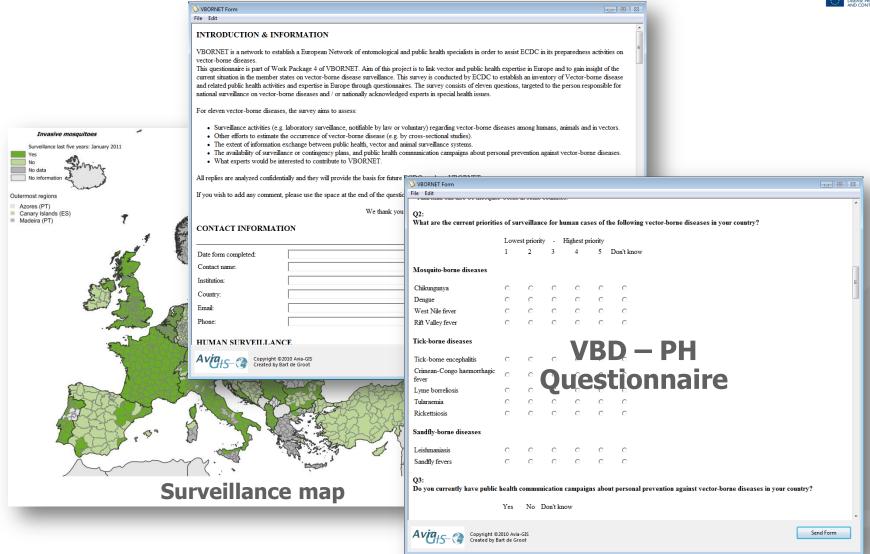

VBORNET – strategy

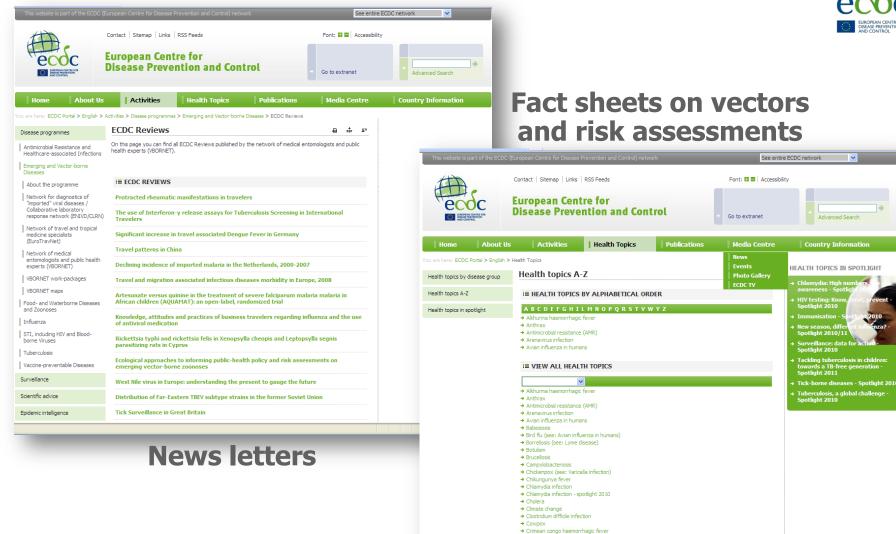

To provide epidemiological **updates** and **fact sheets** and to **communicate** to our stakeholders

VBORNET – communication

Internet

ess/Pages/index.aspx

→ Crisis communication
→ Cryptosporidiosis
→ Cutaneous warts
→ Dengue fever

VBORNET challenges

- Integration of VBORNET database in ECDC IT platform
- Updating & high quality maps
- Strategy on vector-borne diseases
- Public health medical entomology interface

Link stakeholders
